Our UK business, Admiral, has launched a co-branded repair centre in Daventry, West Northamptonshire in partnership with Fix Auto UK.

The site will operate as a dedicated repair centre for Admiral customers across Northamptonshire, helping to increase repair capacity and deliver a high-quality repair experience. The Daventry site builds on a partnership that has spanned nearly a decade, underpinned by shared values and a focus on good customer outcomes.

**Scott McCammon, Head of Motor Repair at Admiral, said:**

“We’ve worked with Fix Auto UK for nearly a decade and are excited to welcome Daventry into our co -branded repair sites. Admiral customers across Northamptonshire will benefit from Fix Auto’s dedicated capacity and strong operational standards, supporting a consistent, high-quality repair journey.”

**Ian Pugh, Managing Director for the Advantage Group of Companies, said:**

“This development represents a natural progression of our relationship with Admiral, built on shared values and a clear focus on performance, quality and customer outcomes. By further aligning our operational approach, we’re able to remove friction from the repair process, improve efficiency and deliver a more consistent experience for customers, while also supporting Admiral’s broader network strategy.”
